

Year 4 to 13 BYOD Parent Agreement

Please tick to indicate your agreement and sign on the next page

- We have read, discussed and signed the Cornerstone Christian School's Computer and ICT Acceptable Use Agreement.
- We agree to _____ using ICT equipment to access the web as outlined.
- We understand that general school Computer and ICT Acceptable Use guidelines are on the school website (www.cornerstone.ac.nz).
- We understand that additional helpful information is available at www.netsafe.org.nz.
- We understand that we can talk to the class teacher should we have any concerns about cyber-safety at school.
- Should cyber-bullying occur we agree to report it to the school as soon as it happens.
- We have read and discussed the school BYOD Programme.
- We understand that all BYOD devices need to be registered with the ICT coordinator before being used on the Cornerstone Christian School network.
- We are supplying our child with a BYOD according to the specification outlined in the policy.
- If we choose to provide our son/daughter with a 3G/4G/5G device, we understand that it will not be monitored by the school since these are not required devices
- We understand that any device at school is subject to the Ministry of Education's guidelines for the safe and responsible use of digital technology in schools. We also understand that the Ministry of Education guidelines for the surrender and retention of property and searches will apply to our son/daughter's digital device at school or on school based activities.
- We understand the following conditions also apply to our child's BYOD:
 - School will make every effort to provide a safe place for devices, but cannot take responsibility for loss or damage to devices.
 - Parents are expected to insure any device brought to school.
 - All reasonable efforts will be taken to retrieve lost devices and normal school behaviour management policy and procedures will apply.
 - Repairs, maintenance, updates etc are the responsibility of parents.
 - Up to date security software must be installed.
 - The school will require any BYOD device to have a small piece of software installed, to assist with monitoring of internet use. This will only operate while the device is connected to the school network. At these times, teachers will have the ability to monitor or block any internet (or other) activity that they deem to be inappropriate. If this software is removed, the student account will be suspended for 2 weeks or as decided by the staff involved. This will mean that the student will be unable to access the school network during this time.

In the event that inappropriate or unacceptable content is found then normal school behaviour management procedures will apply and the provisions of the Computer and ICT Acceptable Use Agreement enacted.
